SUMMARY

Dynamic Android and Website Developer with a freelance background, specializing in native technologies and web development. Leveraged Android SDK and JavaScript to create impactful mobile and web applications, reducing crashes and enhancing user engagement. Excelled in UI/UX design and problem-solving, demonstrating strong communication and collaboration skills. Proven track record of delivering projects efficiently, meeting both client and user needs.

WORK EXPERIENCE

Website Development , Freelance	Jan 2024 - Aug 2025
- Designed mobile-first websites using progressive enhancement techniques, catering to a growing mobile audience. - Participated in project planning sessions to define requirements, set priorities, and establish timelines for delivery of new features. - Developed user-friendly web forms with validation and error handling.	
Android Development, Freelance	Jun 2024 - Aug 2025
- Created custom mobile applications using react native technologies. - Reduced application crashes by proactively monitoring crash analytics reports and addressing any issues found. - Worked closely with UI/UX designers to translate wireframes into fully functional Android apps that met both design specifications and user requirements. - Used third-party libraries, custom libraries and APIs to develop new applications.	
React Native Developer, Internship (Kawan Kerja)	Mar 2025 - Jun 2025
- Developed a WhatsApp broadcasting application using React Native and Android Intent. - Implemented message sending features for both single and multiple phone numbers. - Integrated contact number retrieval from phone contacts and Excel (.xlsx) files. - Collaborated with the team to ensure seamless feature integration across various Android devices.	
Web Developer, Internship (Pusat Pengembangan Bahasa UIN JKT)	Mei 2025 - Juli 2025
- Revitalized the company profile website into a modern and user-friendly interface. - Enhanced the user interface (UI) with a clean and responsive design using Laravel Filament, and livewire - Optimized navigation and content structure to improve accessibility for both general users and internal staff.	
Interactive TOEFL & TOAFL App Developer, Internship (PPB UIN)	Mei 2025 - Jan 2026
- Built an educational mobile application similar to Duolingo to support TOEFL and TOAFL preparation on Android. - Developed interactive features such as responsive and user-friendly Reading, Listening, and Speaking practice modules. - Added a leaderboard feature to boost learning motivation through a user ranking system. - Implemented a class recommendation system using Fuzzy Logic based on users' test results.	

Full Time Software Engineer, Wintech**Okt 2025 - Nov 2025**

- Designed and developed user interfaces with a strong focus on intuitive UI/UX principles and seamless user experience
- Defined and structured information architecture to improve navigation flow and usability
- Conducted user research and user testing to validate features and enhance overall product experience
- Built and maintained web applications using Next.js and React.js
- Utilized modern React features such as React Hooks (e.g., useState, useEffect) to create scalable and maintainable code
- Optimized web performance including loading speed, responsiveness, and SEO best practices
- Developed a Warehouse Management System (WMS) mobile application using React Native with Expo
- Implemented core features such as inventory management, item tracking, and warehouse data input
- Collaborated with cross-functional teams (product, backend, and operations) to deliver high-quality solutions aligned with business needs
- Performed debugging, testing, and continuous improvements to ensure application stability and performance

Teaching Asisstant, Introduction to Programming (UIN JKT)**Okt 2024 - Dec 2024**

- Assisted the lecturer in delivering fundamental programming concepts to first-year students.
- Guided students during programming lab sessions using C and Python.
- Prepared practice problems, evaluations, and facilitated discussion and review sessions.
- Provided academic support both in-person and online to strengthen students' understanding.

Teaching Asisstant, Content Management System (UIN JKT)**Okt 2024 - Dec 2024**

- Assisted the lecturer in teaching CMS course with a focus on Joomla platform.
- Guided students through installation, configuration, and management of Joomla-based websites.
- Prepared practical modules and project-based assessments for hands-on learning.
- Provided technical support and supervision during lab sessions.

Event Assistant – Machine Learning & Software Engineering Workshop (UIN Jakarta)**Nov 2024**

- Supported the execution of a workshop led by Prof. Ismail Khalil on Machine Learning and Software Engineering.
- Assisted in technical and logistical coordination, including preparation of presentation materials and supporting tools.
- Acted as liaison between participants and speaker to address questions related to the topic.
- Documented the event and provided assistance during practical sessions and discussions.

Freelancer IoT System, Freelancer**Nov 2024**

- Specialized in building IoT-based solutions, with a focus on RFID attendance systems
- Designed and developed an RFID-based attendance system for students, enabling automated and efficient check-in processes
- Integrated hardware components with backend systems for real-time attendance tracking and data synchronization
- Built supporting web dashboards using php native to monitor attendance data and system activity

ORGANIZATION EXPERIENCE

Member UI/UX and Web Developer, GDSC UIN Jakarta **Oct 2023 - Mar 2024**

- Designed user-centered web interfaces and improved overall usability for community projects.
- Collaborated with other members to create design mockups and prototypes, ensuring alignment with project goals.
- Contributed to the development of responsive websites and optimized front-end performance for better user experience.

Team Logistics, UI/UX Competition, GDSC UIN Jakarta **Jan 2024- Feb 2024**

- Coordinated logistics and resource management for the UI/UX competition, ensuring smooth event execution.
- Managed inventory and prepared event materials for participants and judges.
- Worked closely with the organizing team to maintain schedules and ensure proper allocation of resources.

Head of Android Developer, GDGOC UIN Jakarta **Oct 2024- Jun 2025**

- Organized and managed mini bootcamps and weekly classes to enhance members' Android development skills.
- Supervised and mentored members, providing guidance on project implementation and career development.
- Delivered in-depth training sessions on Android development, covering best practices and modern frameworks.
- Coordinated with mentors and managed the workflow for final projects, ensuring high-quality deliverables from all participants.

EDUCATION

Bachelor of Computer Science (S.Kom) **Aug 2022 - Present**

Syarif Hidayatullah State Islamic University Jakarta

- Relevant Courses: Software Engineering, Data Structures, Machine Learning, Mobile App Development

Natural Science Major **Jul 2019 - Jul 2022**
SMA NEGERI 10 Depok

ADDITIONAL INFORMATION

- **Technical Skills:** Website Development, Analysis, Android Development, Figma
- **Languages:** English (passive), Indonesia (Active)
